- Principles of UX/UI Design
- Introduction to Front-End Development
- Coding Interview Preparation
- Advanced React
- HTML and CSS in depth
- Front-End Developer Capstone
- Programming with JavaScript
- Version Control
- React Basics

Achievements

- Meta Front End Developer Badge issued by Credly

Projects

E-Commerce Food Industry Website | HTML, CSS, Microsoft Visual Studio

- In todays world of E-Commerce, I have built an E-Commerce website as My internship project for a hypothetical restaurant name Calmandcode, a fast food industry.

  Technologies Used:
  NodeJS & EJS (Embedded JavaScript Templates)

  Key Features:
  Home Page :
  Booking a table and generating related docs as pdf
  Static Customer reviews
  Showcasing the restaurants details which are essential are provided in about section.
  Navigations are present in the header section.

  Product Page :
  Dynamic page wherein you can interact with the menu cards of various products you wish to buy. All the related common features being present already.

Payment Gateways Integration:
PayPal Configuration
Integrated PayPal for effortless payments, catering to diverse customer preferences. Option for debit/credit card has been provided.

UI/UX :
I have delivered the best experience to the user in segment at my level.

Delicious Eats Website | HTML, CSS, Microsoft Visual Studio
- Developed a user-friendly front-end for Delicious Eats, integrating reservation forms with error handling and seamless booking confirmations. Using HTML, CSS, and Visual Studio, I ensured the design adhered to branding guidelines. This project showcases my proficiency in front-end development, UI/UX design, and attention to detail.

Little Lemon Website | Figma
- Optimized efficiency and crafted engaging screens for a seamless booking experience while keeping brand consistency. Listened to user feedback to identify pain points and refine the solution, ensuring it met both customer needs and business goals.

Calculator App | React, Visual Studio Code
- Focused on creating a user-friendly, intuitive interface for a responsive app that performs basic arithmetic operations seamlessly. Ensured a smooth, hassle-free user experience.

Portfolio App | React, Visual Studio Code
- Created a responsive portfolio web app featuring dynamic header visibility, a user-friendly design, certification and specialization section. Organized projects in a visually appealing grid to showcase work my effectively.

Delicious Eats Homepage | HTML, CSS, Visual Studio Code
- I developed the homepage for Delicious Eats using HTML and CSS, focusing on a structured, responsive layout with a header, main content, and footer. I designed an engaging interface, prominently featuring the client's logo and captivating visuals to enhance brand identity. Prioritizing user experience, I used intuitive navigation and interactive CSS elements for better engagement. Collaborating closely with the team, I meticulously refined the design, surpassing project goals with attention to semantic HTML and polished aesthetics.

Relevant Coursework
- Object oriented programming in C++ and Java
- Data Structures and Algorithms
- Computer Organization
- Software Engineering
- Database Management & Query Processing
- Operating Systems
- Web Technologies
- Formal Languages and Automata Theory

Technical skills
- Programming Languages : C, C++, Python
- Web development Languages : HTML5, CSS3, JavaScript
- Web development Tools & Framework : Bootstrap 5.3, SASS, SCSS, jQuery, EJS, React.js Next.js, Version Control
- JavaScript Runtime Environment : NodeJS
- App development : React Native
- Software tools : Visual Studio IDE, GitHub, Figma, Android Studio
- Web Hosting : FileZilla & Vistapanel
- Skilled in Problem solving & Project Management
